## **Guns Trade-In Program**

The Georgia Department of Administrative Services, State Purchasing Division, has established a Trade-In Program for all authorized state entities and other users of this Statewide Contract (SWC).

The two suppliers participating in this program are Smyrna Police Distributors, Inc. and Clyde Armory.

The Fair Market Value (FMV) for the firearm(s) to be traded in will be based on its condition. For any authorized user who wishes to trade-in a firearm(s) whose finish diminishes over its lifespan, the Percentage System will be used to determine the firearm's condition. All firearms will use this system unless the firearm's finish does not diminish over time. When the firearm's condition is to be determined by the Percentage System, the Blue Book of Values (by Fjsted) must be used. This manual explains the Percentage System and how each firearm's percentage of finish will be determined. This manual will also provide an appraised value of the trade-in firearm(s) to the percentage of finish determined.

For any authorized user who wishes to trade-in a firearm(s) and its finish does not diminish, this firearm's condition will be determined by the National Rifle Association (NRA) Condition Standards. This system involves various ratings such as "Excellent", "Very Good", etc. When the firearm's condition is to be determined by the NRA Condition Standards, the Standard Catalog of Firearms (by Schwing) must be used. This manual explains the NRA Condition Standard and how each rating will be determined. This manual will also provide an appraised value of the trade-in firearm(s) to the rating determined.

To properly assess each firearm's FMV for trade-in, the supplier will have available the latest editions of the Blue Book of Gun Values and the Standard Catalog of Fire Arms. To ensure FMV, the supplier will honor the pricing provided by these manuals. For any firearm(s) proposed for trade-in not listed in the Blue Book of Gun Values or the Standard Catalog of Fire Arms, the trade-in price is subject to the mutually agreed upon price between the supplier and customer. If a dispute arises between the customer and supplier over the appraised value of a firearm(s) to be traded in based on the guidelines above, authorized users of the contract may dispose of the firearm(s) by any other method authorized by state law.

Every firearm(s) traded in will receive a trade-in allowance equivalent to its assessed FMV. This allowance can be applied toward the purchase of new firearms or can be used for store credit to purchase any other items in the store. The items can be contract or non contract related. For the non contract items purchased, the purchase shall not exceed \$5,000 by any individual state agency during any state fiscal year. The customer must provide the supplier the trade-in firearm(s) and remit payment within 45 days after receipt of invoice.

In order to prevent "flipping" of firearms (i.e. prevent the purchase of firearms at the discounted prices provided by the contract and their immediate trade-in at higher retail prices from the Blue Book of Gun Values or the Standard Catalog of Fire Arms), firearms neither issued nor discharged by authorized users are ineligible for trade-in.

Please contact the Issuing Officer of this SWC for any questions pertaining to the trade-in agreement.

**THE FOLLOWING OPTIONS AND NOTES APPLY TO ALL GLOCK MODEL NUMBERS:**

**OPTION NO.1:** Deduct from each pistol if name stamping is to be omitted \$14.00

**OPTION NO.2:** Deduct from each pistol if Trijicon Night Sight is to be omitted and standard and sight is supplied \$58.00

If other than S# New York trigger pull is required it must be noted on order at no additional cost.

Stamping may be subject to maximum number of characters and minimum order quantities by manufacturer.
