## Procure Construction Quicker and Easier with EZIQC®

Since the fall of 2009, DOAS has made EZIQC® construction contracts available for use by all state agencies (as convenience contracts) and all other public entities in Georgia. EZIQC® is an Indefinite Quantity Construction Contract best suited for repair, alteration, modernization, rehabilitation and minor new construction projects. The contracts are already competitively bid and awarded, and contractors are standing by for immediate use. A revolutionary procurement tool, EZIQC® is an excellent way for facility owners to procure high quality construction, at a competitively bid price, faster than any other delivery method available.

Through use of either of the two EZIQC® prime contractors, owners can tap into proven **local subcontractors**, many already familiar with their facilities, to get their jobs completed quickly. Instead of taking up to six months from project identification to purchase order, EZIQC® will allow you complete the procurement process in **28 days or less**.

The EZIQC® process is simple and straightforward. Simply log on to [www.EZIQC.com](http://www.EZIQC.com), enter basic project and contact information, and an EZIQC® representative will contact you to get the process started. The EZIQC® representative will also support you through the entire procurement process.

The program has already proved to be a successful tool for state agencies, as well as other public entities around Georgia. In addition to state agencies, satisfied users include technical colleges, the University System of Georgia, the Georgia National Guard, cities, counties, and K-12 school systems.

"I am very pleased with the way our contractor has reacted to the changing dynamics within our Georgia National Guard Building 70 Renovations Project in Marietta," says Kate Burgess, Georgia National Guard director of purchasing and contracts. "I look forward to future projects such as the ones at the Augusta Amory that should start in January 2011, totaling approximately \$1 million."

One of the more flexible tools available for procuring construction and aiding facility owners with budgeting and planning, EZIQC® allows you to scope and price projects now, knowing that the pricing will remain fixed through the end of the fiscal year (June 30, 2011) and beyond.

You can get started immediately! Go to [www.EZIQC.com](http://www.EZIQC.com) to begin the process.
